Internship / Training

Full Stack Developer (2024) | Cipher Schools

June 2024 – Aug 2024

- Built a robust library management system using React.js, incorporating various libraries and frameworks to optimize efficiency.
- Strengthened expertise in the MERN (MongoDB, Express, React, Node.js) stack by effectively integrating and managing APIs.
- Gained a deep understanding of core web development principles, such as code management practices, ensuring clean, maintainable code through version control and collaboration tools like Git.

Projects

Laundry Management System | PHP, MYSQL, HTML, CSS

June 2024

- Designed a beginner-friendly database with essential tables - orders, services, and users; focusing on simplicity and efficient data organization.
- Created distinct dashboards with role-based access for customers and administrators, enhancing usability and security. Customers can view order status, while admins manage service details and oversee orders.
- Built a PHP version of the system with MySQL on XAMPP, following a similar functionality layout and database structure.

Library Management System | MERN

July 2024

- Developed a Full-Stack Library Management System utilizing the MERN (MongoDB, Express.js, React.js, Node.js) stack, allowing efficient management of books, users, and transactions, with a user-friendly and responsive interface.
- Integrated advanced features such as user authentication, real-time updates, and role-based access control (RBAC), enhancing security and functionality for both administrators and end-users.
